Announcement of the
1st IIS-CED Analytics Workshop
Bad Soden, June 8, 2006

(1st Bad Soden Workshop on Isotopically Labelled Compound Analysis)

Dear colleague,

This is to announce the 1st Bad Soden workshop on isotopically labelled compound analysis, to be held in June 2006 in the Parkhotel Bad Soden.

During the recent IIS-CED Bad Soden conference on labelled compounds and their application it was discussed to have a special workshop on modern analytics in the field of isotopically labelled compound characterisation.

The scope of the workshop - which focusses on isotopes applied in pharma and agrochemical R&D - would be on methods, instrumentation, application, regulatory and practical aspects of analytics. Emphasis will be given to identify trends in order to capture future requirements. There will be invited presentations as well as special sessions and an open forum.

The workshop is planned for June 8, 2006 (9-16). If you would like to receive further information and possibly plan to attend, please send a short informal note to pja.ochsenschlaeger@sanofi-aventis.com.

On the occasion of this workshop there will be also the 2006 IIS-CED business meeting.

Sincerely yours,

Dietrich Gantz
